

# TEST TO TREAT INFOSHEET

If you are at high risk of getting very sick from COVID-19, and test positive, treatment may be available.

Get tested as soon as possible after your symptoms start.

Contact your healthcare provider right away if your result is positive.

Don't delay. Treatment must be started early to work.

[cdc.gov/coronavirus](https://cdc.gov/coronavirus)

## Step 1: Get Tested

Get tested for COVID-19 at a Test to Treat site or bring your test results from an at-home test, a pharmacy, or your health care provider with you to your visit.

You can use the web-based [Test to Treat locator](#) to find a participating site near you. You can also call [1-800-232-0233](tel:1-800-232-0233) (TTY [1-888-720-7489](tel:1-888-720-7489)) to get help in English, Spanish, and more than 150 other languages. The call center is open from 8am to midnight ET, 7 days a week. In addition, the [Disability Information and Access Line \(DIAL\)](#) is available to help people with disabilities access services.

## Step 2: Get a prescription from an on-site healthcare provider if you are at high risk of getting very sick

If you test positive for COVID-19, ask the on-site health care provider during your appointment if you are eligible for a prescription for a COVID-19 oral antiviral treatment. Bring any medications (or a list of the medications you are currently taking) with you to your appointment.

## Step 3: Get Treated

Ask the on-site or affiliated pharmacist to fill the prescription. Once your prescription has been filled, you can take your oral antiviral pills with you to begin treatment!

## COVID-19 Testing Only

**Heavy Construction Laborers**
